

Chang Wei-Shan

Frontend Engineer / Full-Stack / AI Tooling

2.5 years of frontend development experience spanning frontend (React / SCSS / Vite), backend (Node.js / Express) and cloud deployment (GCP Cloud Run / GitLab CI/CD). Experienced in WebSocket real-time systems and IoT monitoring, with hands-on DevOps and observability (Grafana, ELK). An early adopter of AI tooling with deep command of Claude Code, MCP servers, and Agent/Hook development.

Experience

EXPERIENCE

2024.07 — 2026.06	Frontend Engineer (Full-stack / DevOps) Infinite Creativity Co., Ltd. - Maintained multiple products: React, Node.js, Express, WebSocket, Redis, SCSS, Vite, Webpack - Led the company's first cloud migration: K3s for dev/test, GCP Cloud Run for production, zero-downtime deploys via GitLab CI/CD + Docker - Systematized the migration into a Claude Code Skill, cutting later products' cloud migration from one month to 3–5 days - Introduced Grafana + ELK log visualization; replaced Jaeger with Pino to cut monitoring resource costs - Led internal Claude Code training; built Figma MCP for the design team; packaged repetitive work into Skills/MCP, turning half-day tasks into under 10 minutes
2024.01 — 2024.06	Frontend Engineer Jiadi Technology Co., Ltd. - Independently delivered 3 large IoT monitoring systems in six months: WebSocket, JSMpeg video streaming, D3.js live charts - Integrated MQTT and Modbus protocols, owning comms configuration and frontend data display - Delivered a one-week power-meter upgrade in two days; designed a WebSocket broadcast lock to resolve multi-user control conflicts

Skills

SKILLS

Frontend	React • SCSS • Vite • Webpack • jQuery
Backend / API	Node.js • Express • WebSocket • Redis • REST API
Cloud / DevOps	GCP Cloud Run • K3s • Docker • GitLab CI/CD
Monitoring / Logs	Grafana • ELK Stack • Filebeat • Logstash • Pino
IoT Protocols	MQTT • Modbus • JSMpeg

Data Viz	D3.js
AI Tooling	Claude Code • MCP Server • Agent • Hook • Figma MCP
Version Control	Git • GitLab • git-flow
